About

The Detroit Blockchain Center is a Michigan based, member run, not-for-profit organization, founded in 2018 by a collection of blockchain enthusiasts and businesses.

As a leading Blockchain education center in SE Michigan, the Detroit Blockchain Center helps individuals, schools, universities, small business, corporations, not-for-profits, charities, community leaders, and governmental organizations to better understand blockchain technology, Web3, and other decentralized technologies; attract and encourage outside investments into blockchain related businesses within Metro-Detroit; and create opportunities for area blockchain startups.

Learn more about the Detroit Blockchain Center and consider becoming a member and volunteer.

Moving Towards The Decentralized Future

Much has changed since DBC launched 5 years ago. From DeFi and DAO's to NFT's & Web3, the crypto sphere has rapidly expanded from a speculation only market to a realm of functioning protocols, applications, and organizations.

Global lock-downs, mass inflation, and collapsing economies around the world have highlighted more than ever the need for decentralized systems and human privacy.

Through all of this, Detroit Blockchain Center has remained absolute in its commitment to drive the Decentralized Future forward through education, inspiration, and innovation.

During the pandemic, we've remained active hosting and moderating multiple online & in-person panels around decentralized voting, Web3, NFT's and digital assets, decentralized ID's and more.

DBC has also met with multiple interest groups from real-estate coalitions to developer groups looking to enter the space to the U.S. Department of State's international delegate exchange.

DBC also launched a podcast, [The Blockument](#), focused on teaching core concepts from basic "What Is Money" to more advanced topics such as blockchain consensus mechanisms and the logic behind differing DeFi mechanisms.

2023 will be no different. DBC will continue to advance blockchain and related technologies while framing Metro-Detroit and SE Michigan as a hub of innovation throughout the space.

Focus

Establish a brand as Detroit's leading organization for distributed ledger technologies.

Initiate community outreach and educational programs for those with limited access.

Provide a pool of resources for area businesses and startups in the DLT/Blockchain space.

What We Do

TECHNOLOGIES

Big Picture

Build Resources

Begin building a community-goods project implementing blockchain technology. Expand DBC funding sources & staffing.

Self-Sustainability

Through past activities, ensure DBC is self-sufficient financially & staffing

2023

2024

2025

2026

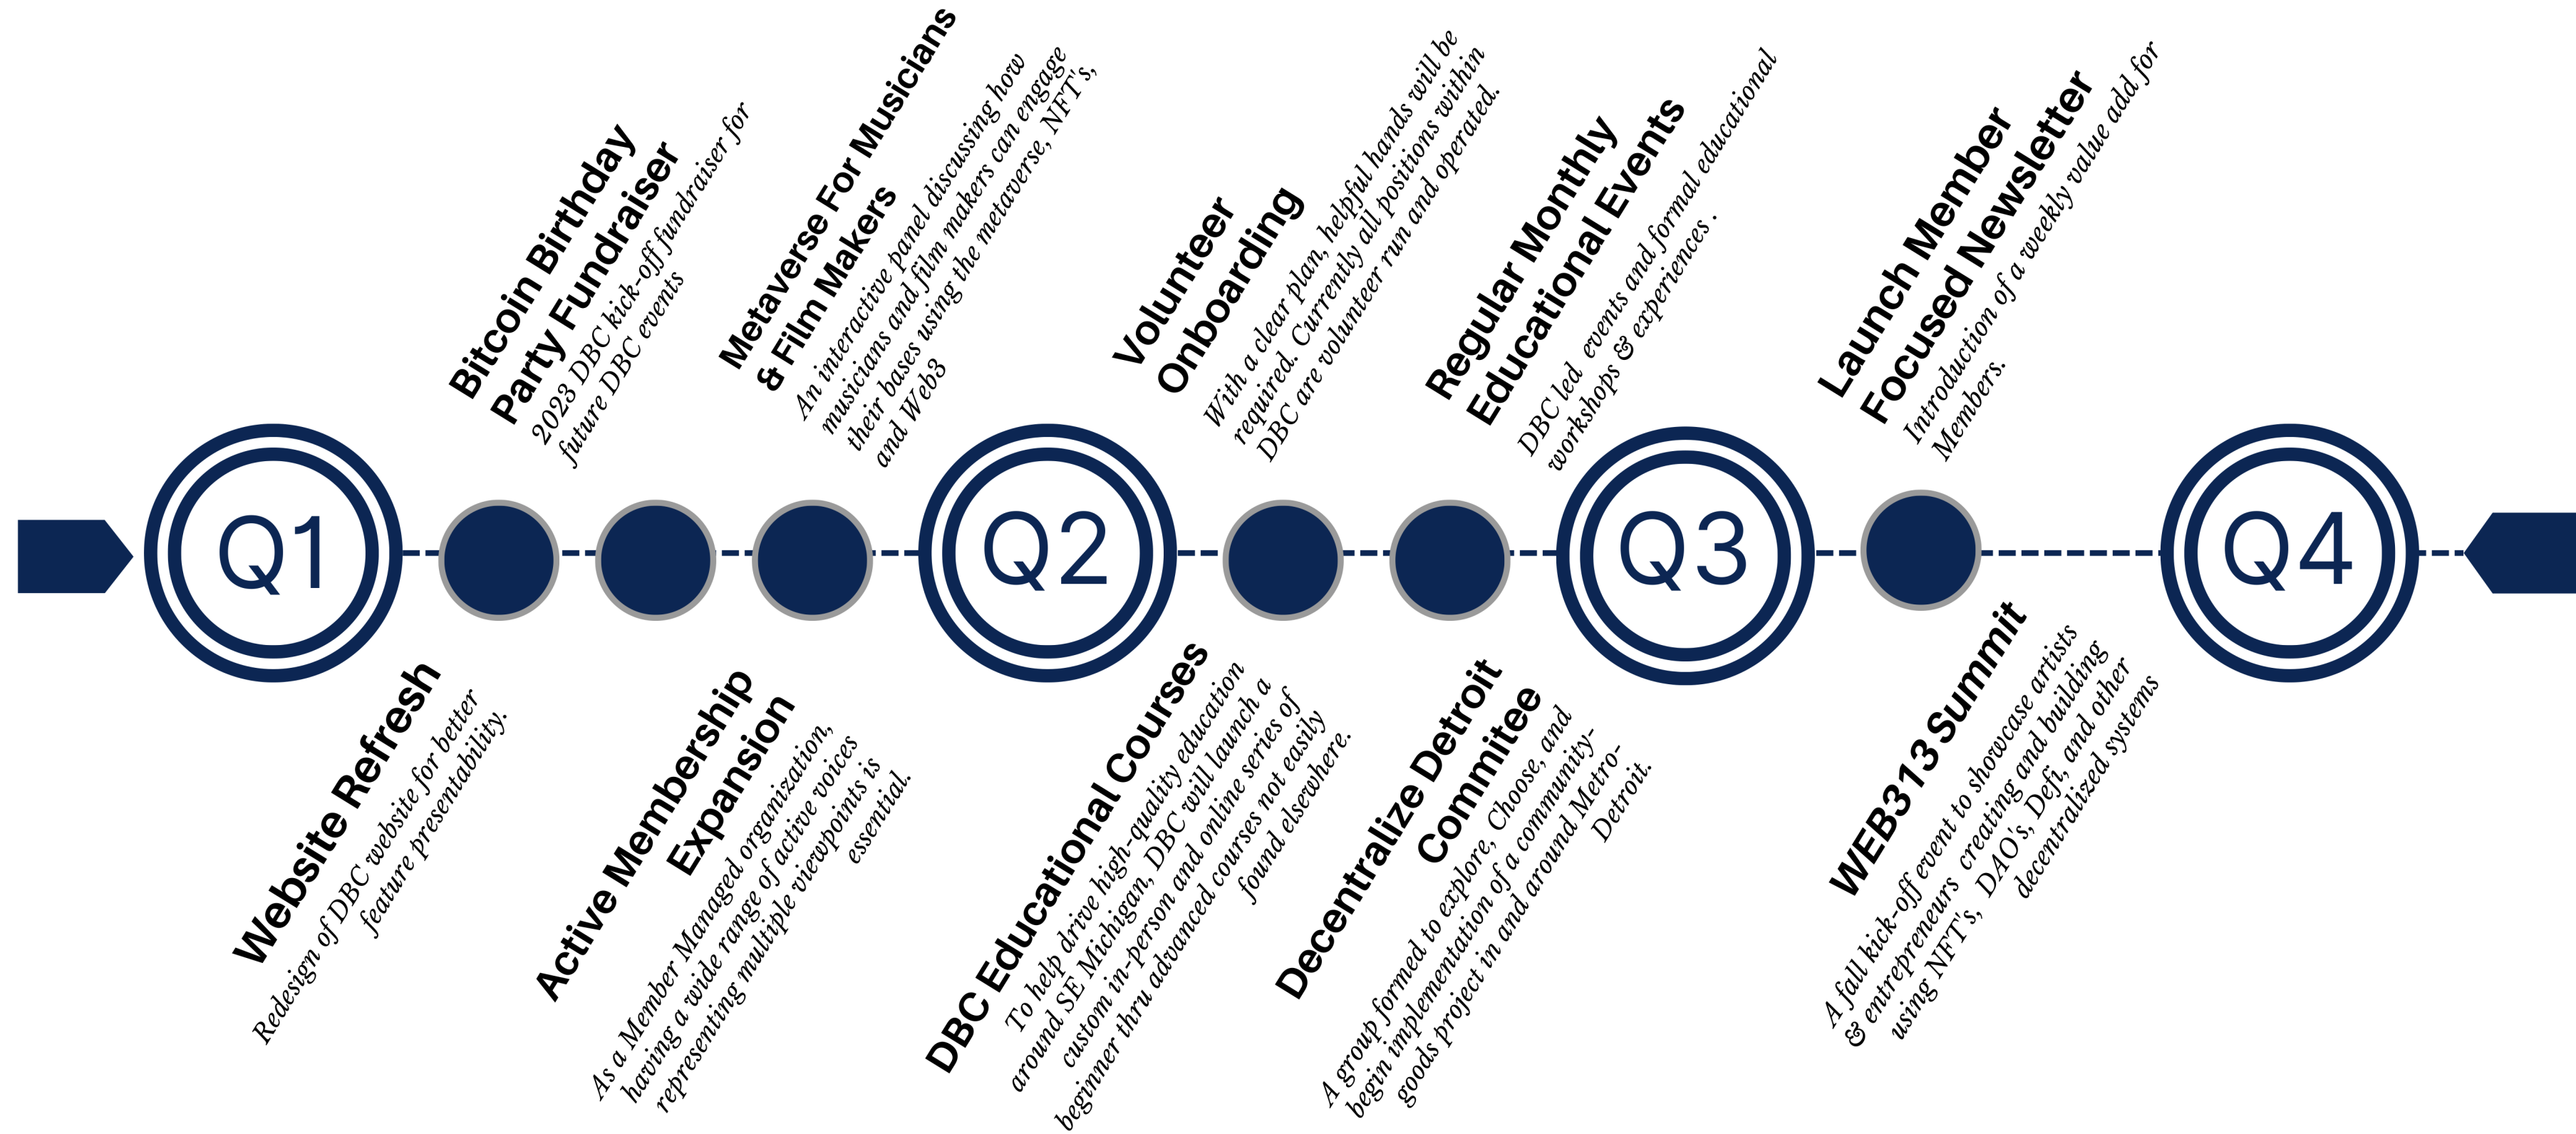

Grow Community

Expand membership & volunteer base, build organizational partnerships, launch formal curricula around blockchain development, business implementations, and financial/digital literacy

Support Business

Establish supports & resources for entrepreneurs & organizations building tools & services on or related to blockchain technology
